What is RHQ

RHQ is a cloud-based business information web portal designed to provide business owners, executives and managers with the information they want, when they want it.

RHQ provides valuable services to both independent business operators and to chain operations.

Independent Operators

RHQ gives “Independence” back to the Independent operator. Owner/operators benefit from the freedom of having sales and labor information available to them anytime and anywhere.

Chain Operators

RHQ gives chain operators powerful sales and labor analysis tools that help improve the bottom line. Information is available by management group or across the entire enterprise.

Make price changes from headquarters and distribute to a single store or to the entire chain of stores.

All brand and product names are trademarks, registered trademarks, or service marks of their respective owners. NCC continually makes efforts to improve its products. Therefore, NCC reserves the right to change specifications without prior notice.
